

### **Amendments to the Abstract**

Please add the following abstract on a separate sheet:

#### **Abstract**

#### **Reflectron**

A reflectron (109) is provided with at least two sets of field resistances (131a-131n, 137a-137n) which may be connected together or separately to the reflectron electrodes (123a-123n) in order to be able to provide a plurality of different shaped electrical fields inside the reflectron (109).
